**DETAILED ACTION**

***Allowable Subject Matter***

Claims 1-2 and 5-14 are allowed.

***Examiner's Statement of Reason for allowance***

The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record, *Moon et al* (USPAP 20040010462) teaches a method and corresponding system for completing a transaction using a transaction device comprising: a transaction device associated with a transaction account and a transaction account identifier identifying the transaction account, said transaction device including a transaction device database for storing said transaction account identifier and transaction device proxy code preloaded onto the transaction device; said transaction device in communication with a POS system, the POS system is configured to receive the transaction device proxy code from said transaction device; and a transaction device account issuer system configured to: maintain the transaction account associated with the transaction device, receive the transaction device proxy code, correlate the transaction device proxy code with the transaction account, and process the transaction using the transaction account (sections 0023, 0027-0031).

Art Unit: 3691

The prior art of record, *Raspotnik et al* (US 5832090) teaches a stored value system comprising a host computer, a reader/writer that communicates with the host computer and an RF transponder that communicates with the reader/writer (abstract and figures).

The prior art of record, *Johnson, Jr. et al* (US 6078888) teaches providing a secure transaction with a tag and POS device associated with a host network authorization system. The tag is adapted to communicate with the POS device which further communicates with host network to authorization of the tag and carry out the transaction (abstract, figures)

*Moon , Rasposnik and Johnson* fail to teach a method and corresponding system for completing a transaction using a transaction device comprising:

*a transaction device reader system in communication with a transaction device and configured to receive a transaction account identifier from the transaction device, wherein after receiving said transaction account identifier, said transaction device reader system generates a transaction device proxy code, deletes the transaction account identifier, and does not communicate the transaction account identifier for use in further transaction processing.*

For this reason, claims 1 and 12 are deemed to be allowable over prior art of record and claims 2, and claims 2, 5-11 and 13-14 are allowed by dependency.

Any comments considered necessary by the applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reason for Allowance".
